

## **009 Kathy**

Kathy is cartoon-like, her breasts and arms exaggerated in their smallness dwarfed by her over-large hands. The overall effect is ridiculous. She is not likely to be taken seriously.

I am certain that many women will identify with the feeling of being overlooked and undervalued because someone has assumed we are only the sum of our sexual parts; that our intellect, intuition, judgement and education is lacking.

Even today, top women executives report routinely being ignored, patronized and insulted by male coworkers. In 2017 Fortune 500 reported just 25 female CEOs. That number represents only five percent of America's most successful businesses being headed up by women. For businesswomen the glass ceiling is still very much in place.
